TRUE ACT

Life is big and full of things that affect us, even if we didn't choose them—even if they aren't our fault. But, life is full of a lot of small things too. Things that may seem insignificant—but, when we take a closer look, we are able to see how important and special they really are.

For example—our fingerprints. No one else in the history of this planet has the same fingerprints that you do. No one ever has and no one ever will. When you turn your hand over and see the different ridges and patterns on the tips of your fingers, those are reminders of how detailed the Creator of the universe was when He made you. He knows all about you, from how many hairs you have on your head to every curve and bend on your fingerprint. He knows us and there isn't anything we can do to make Him know us or love us any less.

TRUE ACT

Get a washable marker and color on one of your finger tips, all the way from the first crease to the tip of your finger. While it's still wet, push it down firmly on the center of this page. Once you have your unique print there, think about some things that make you special or different from everyone else. And remember that those things were designed on purpose by something much bigger than ourselves. When you see those unique things, God sees them too—and He is proud of you.
